

BEHIND the SEIZURE®

SPONSORED, NO-COST EPILEPSY GENE PANEL TESTING PROGRAM FOR CHILDREN UNDER THE AGE OF 8 WHO HAVE HAD AN UNPROVOKED SEIZURE

The diagnostic journey can be time-consuming, costly, and emotionally draining. Behind the Seizure® was created to bring you closer to identifying what's behind the seizure, which may impact outcomes for pediatric patients.

TEST TODAY. DIAGNOSE SOONER. CUSTOMIZE CARE FASTER.

- **More than 50% of epilepsies have some genetic basis.** When a patient presents with seizures, genetic testing can help identify 100+ underlying genetic causes. Early genetic testing may be the most direct, cost-effective, and accurate diagnostic tool.¹
- **Many genes are actionable.** Gene panels increasingly help tailor your approach—more than 20 genes have been linked to specific treatment strategies. Identifying a seizure's underlying etiology can enable more precise treatment.
- **Delay can be devastating for patients with genetic epilepsy.** Some genetic epilepsies are neurodegenerative, and may initially present with subtle, non-specific symptoms like language development delay and/or motor disturbance. Genetic testing can help identify the cause of epilepsy before a patient experiences the hallmark signs of regression.
- **Genetic epilepsies may be hiding behind non-specific symptoms.** According to a poster discussing the results of an industry-sponsored test, language delay, motor disturbance, and intellectual impairment are often comorbidities and useful indicators for molecular genetic testing.²

BY INCORPORATING THE BEHIND THE SEIZURE® PANEL INTO YOUR INITIAL WORKUP YOU CAN HELP:

- Shorten the time to diagnosis
- Tailor care to a patient's specific needs
- Identify potential clinical trials relevant to the diagnosis
- Identify risk of disease for family members
- Connect families with patient advocacy organizations.

Order a test for your eligible patients today at BehindTheSeizure.com

PROGRAM ELIGIBILITY & COST

- Any child under the age of 8 who has had an unprovoked seizure is eligible.
- Testing is provided to eligible patients at no cost.
- Specimen samples for this program are accepted from the US and Canada.

GENETIC TESTING WITH INVITAE

The Invitae Epilepsy Panel is a broad, comprehensive panel that tests more than 180 genes associated with both syndromic and non-syndromic causes of epilepsy.

For more information about Behind the Seizure® or to order a test, visit **BehindTheSeizure.com**.
