

Guardus®
overtube

GUARDUS
gentle protection

us endoscopy

listening...and delivering solutions®

Offering protection and peace of mind...

Specifically developed for enhanced protection and safety, the Guardus® overtube system features an exclusive tapered tip design to protect against mucosal damage, while its unique insufflation cap helps maintain insufflation and guard against leakage of body fluids.

The Guardus® overtube is designed to assist with the following endoscopic needs:

- foreign body/sharp object extraction
 - stent removal
 - upper endoscopic mucosal resection
- minimizing the risk of aspiration
 - gastroparesis and achalasia
 - active upper GI bleed
- procedures requiring multiple scope insertions
 - food bolus procedures

insufflation cap

overtube inner
diameter measures
16.7mm

inner tube with
tapered tip

For more information on the Guardus® overtube, contact US Endoscopy today.

product number	description	scope OD (mm)	length (cm)	overtube OD (mm)	overtube ID (mm)	units/box
