

Carr-Locke injection needle

US endoscopy

listening...and delivering solutions®

Trusted performance...

World renowned for its reliability and consistency, the **Carr-Locke injection needle** is ideal for your everyday procedures, as well as your most tortuous, difficult injection therapy maneuvers, including use in duodenoscopes.

now available in 23 gauge

- **Stainless steel, Teflon coated, spring sheath** to virtually eliminate sheath kinking, while offering exceptional functionality and needle performance during challenging procedures
- **Ultra smooth distal metal hub** aids in tamponade and is gentle on friable tissue, helping to prevent sheath perforations
- **Luer-lock, spring-loaded handle** automatically retracts the needle, reducing the risk of inadvertent needle sticks or scope damage

Consistently deploys in retroflexed position

For more information on the Carr-Locke injection needle, contact US Endoscopy today.

product number	sheath diameter (mm)	length (cm)	needle projection (mm)	needle gauge	units/box
