

# LiveData OR-Dashboard™ and Patient Safety

LiveData OR-Dashboard offers a direct response to National Patient Safety goals and requirements, a hospital prerequisite for obtaining accreditation from the Joint Commission (formerly JCAHO)

**Goal 1: Improve the accuracy of patient identification**

**Goal 4: Eliminate wrong-site, wrong-patient, wrong-procedure surgery**

Patient Name is always on display

Case Description is always on display

A Timeout panel appears just prior to surgery, with a checklist specific to a hospital's safety pause protocol

**Staff List**

For always knowing who's in the OR and addressing team members by name

**Goal 8: Accurately and completely reconcile medications across the continuum of care**

Allergies and medications are always visible and automatically included in reports for hand offs

**Goal 2c: Measure, assess and, if appropriate, take action to improve the timeliness of reporting**

Real-time information from physiological monitors and devices is always accurate, always current

Case Reports for hand offs are generated at any time

**National Patient Safety Goal 2: Improve the effectiveness of communication among caregivers**

Goal 2e: Implement a standardized approach to "hand off" communications, including an opportunity to ask and respond to questions
