

Finally, a stapler that is a better fit for your patients. JustRight Surgical®'s precision engineering and micro-machining techniques make it possible to bring this innovation in stapling technology to your operating room.

# SURGICAL STAPLING AS YOU HAVE

ACTUAL SIZE

*the innovation you have been waiting for...*

RIGHT SIZE.

This revolutionary device now makes downsizing all of your laparoscopic ports a reality.

## INNOVATION 40 YEARS IN THE MAKING:

- 9 times smaller than existing stapling instruments
- Security of the gold standard “B” staple formation
- Flexibly in stapler placement with 5 mm shaft diameter
- Smooth and efficient stapling and cutting in one motion
- Optimal jaw length for maneuverability into small spaces
- Easy repositioning with 360 degree jaw rotation

## NEVER SEEN IT BEFORE.

The JustRight 5mm Stapler is raising the bar in general and pediatric surgery. The reduced instrument shaft and optimized jaw length are the advancements that you have been waiting for in procedures where access is limited, visibility is reduced and precision is essential. The JustRight 5mm Stapler was developed with input from surgeons whose procedures require precise ligation and resection.

The ergonomic design and just right size of the instrument enhances visibility, provides greater access in confined spaces and does not require deviation from standard surgical technique. **JustRight Surgical, your micro-laparoscopic solutions company, is here to serve your needs.**

RIGHT FIT.

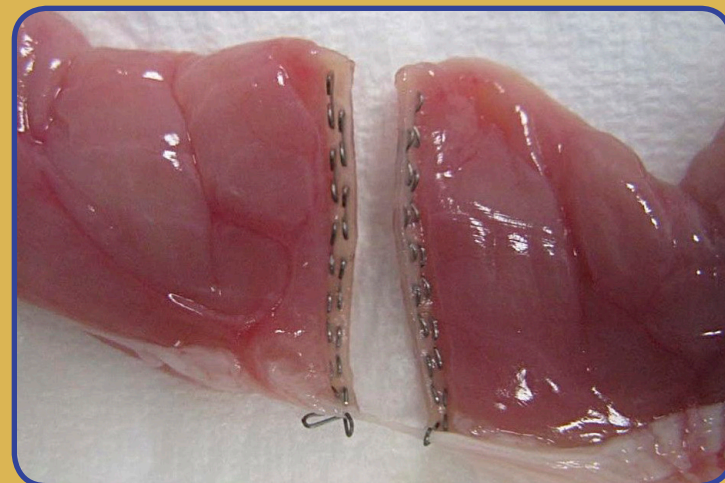

JustRight Surgical has delivered the first classic stapler with a 5mm shaft. The conventional feel of the stapler—the gold standard “B” shape of a 2.0 staple – provides 40 years worth of familiarity and confidence in the design, now in a precise size that really is JustRight.

**NEED WE SAY MORE.**

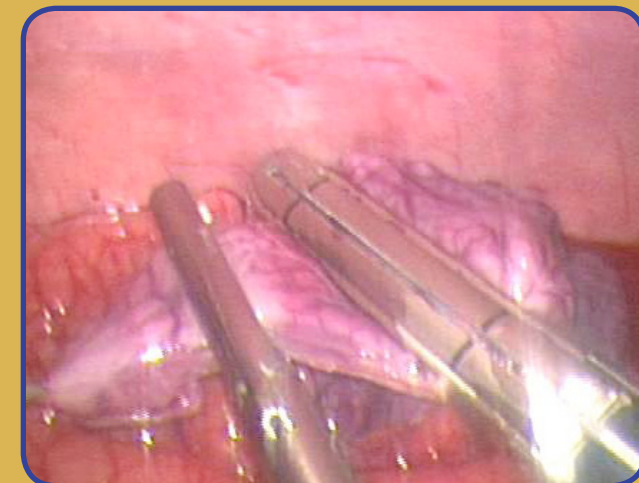

RIGHT CHOICE.

**JustRight™  
5MM Stapler.**

RIGHT  
SIZE.  
RIGHT  
FIT.  
RIGHT  
CHOICE.

The JustRight 5mm Stapler fired in a preclinical setting. The staple line highlights the staggered rows of standard 2.0 mm, "B" shaped staples.

The preclinical laparoscopic image clearly emphasizes the size differential between the JustRight 5mm Stapler (on left) and a standard 12mm stapler (on right).

Product Name	JustRight™ 5mm Stapler
Catalog Number	JR-ST25-2.0
Shaft Length	20 cm
Shaft Width	5 mm
Staple Line Length	25 cm
Staple Leg Length	2.0
