Trenton, NJ

NewYork-Presbyterian  
New York, NY

UCLA Health  
Los Angeles, CA

Mills-Peninsula  
Burlingame, CA

URMC  
Rochester, NY

Ohio Health  
Columbus, OH

Stony Brook  
Stony Brook, NY

Jefferson Health  
Bensalem, PA

UC Health  
Cincinnati, OH

FEWER THAN 0.1%

of stroke patients in the U.S. receive effective treatment within 1 hour of symptom onset. During that hour, more than **120 million brain cells** may die.

# FASTER STROKE TREATMENT

The **Frazer Mobile Stroke Unit** can potentially diagnose stroke in less than **5 minutes**, allowing treatment that may significantly decrease damage caused by stroke.

Equipped with a portable CT scanner and a variety of telemedicine options, the Frazer Mobile Stroke Unit brings the latest in stroke care technology right to the patient.

Onboard CT technology allows the team to scan, transmit images and get results quickly to make the best decisions in the field for immediate treatment.

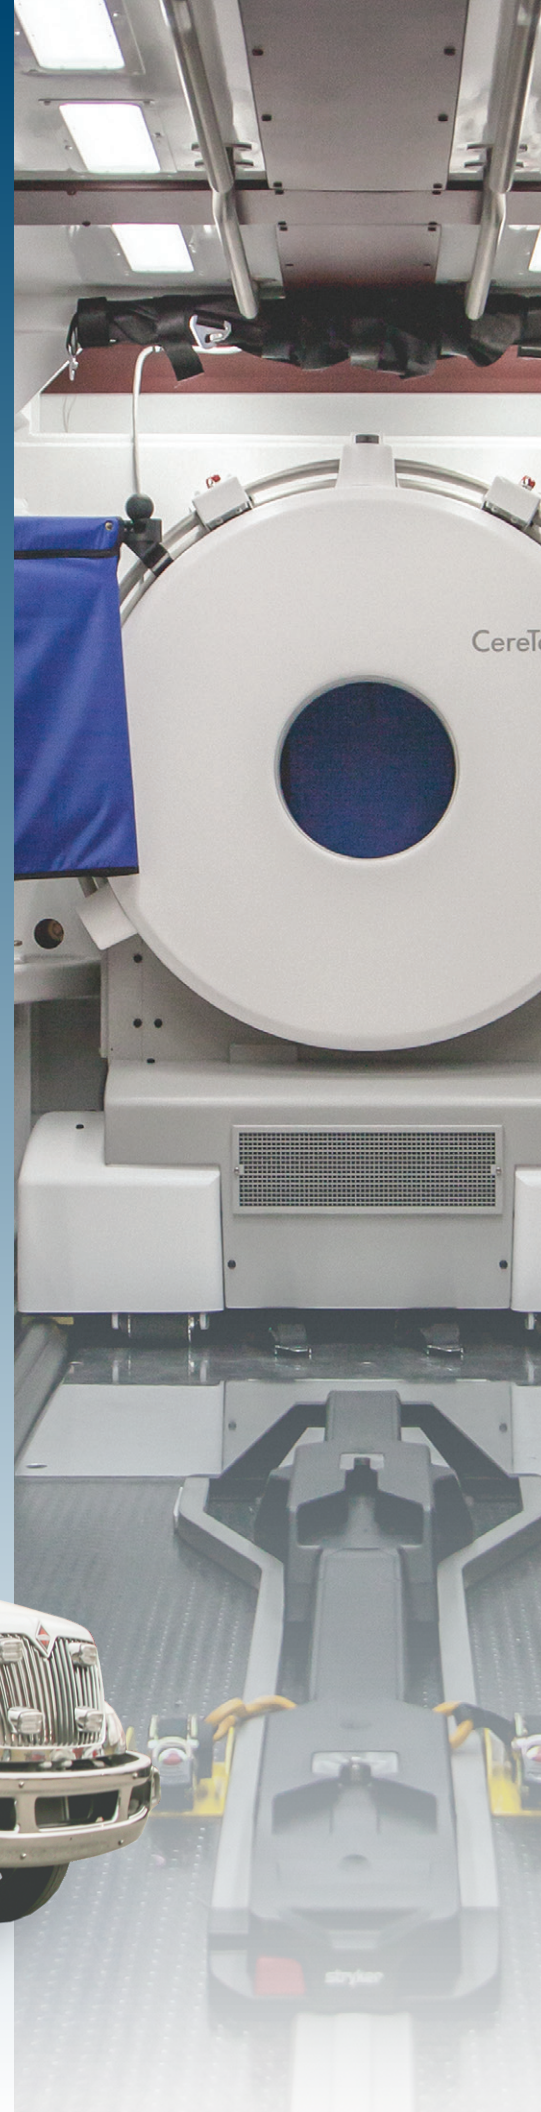

# TELEMEDICINE CAPABILITIES

The Frazer Mobile Stroke Unit integrates your telemedicine platform of choice. We can also guide you through the process of choosing the system that works best for your organization.

## INDEPENDENT POWER

The Frazer Mobile Stroke Unit comes standard with an independent 120V power source. The ability to power your patient compartment without running your chassis is a huge benefit.

# SAFETY

The Frazer Mobile Stroke Unit is built from structural aluminum tubing, aluminum exterior skin, and steel. There is no wood used in the construction. The CT Scanner Mounting & Retention System is designed with both passenger and equipment safety in mind.

All Frazer vehicles are compliant with today's toughest industry standards.

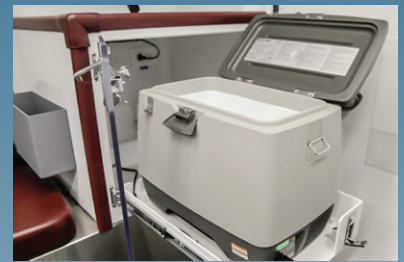

✓ TRIPLE-K ✓ CAAS ✓ NFPA

- 360° CAMERA OPTION AVAILABLE
- LIFE DEFENDER CABINETS
- COT RETENTION SYSTEM
- SAFETY GRAB RAILS
- 6 PT HARNESSES
