

KARL STORZ NAV1 optical

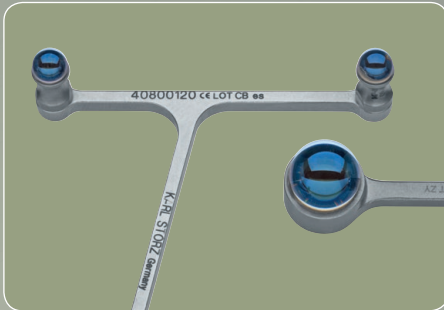

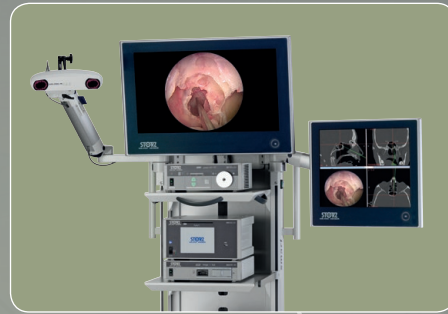

The Integrated Navigation Solution

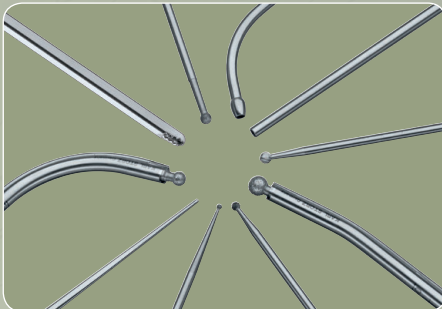

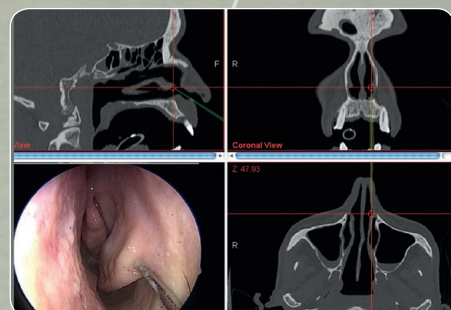

Easy to integrate into
KARL STORZ equipment carts

Autoclavable and reusable
navigation instruments and
trackers thanks to patented glass
marker spheres

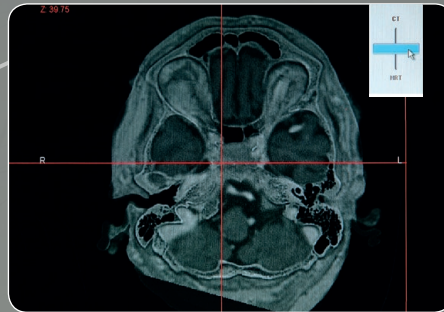

Wide range of conventional as
well as motor-driven navigation
instruments

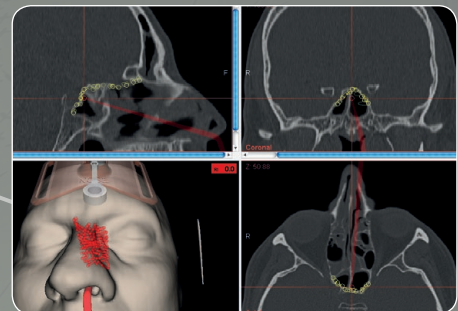

Interactive integration of
endoscopic HD video images with
context-relevant display

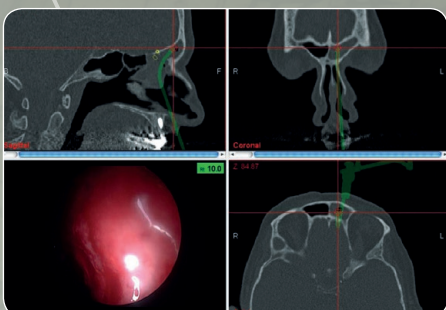

Easy integration into the OR thanks to its compatibility with OR1™

Automatic CT/MR fusion of patient image data for enhanced information content

Planning of risk structures with intraoperative DistanceControl

Display of real-time instrument geometry in radiological patient image data

Space-saving integration into any operating room

The NAV1 optical enables you to benefit from a seamlessly integrated high-performance navigation solution. The basic unit can easily be attached to a ceiling supply unit. Mounted on a ceiling arm, the navigation camera allows an easy setup and optimal visualization of the surgical site combined with high flexibility. This results in a “zero footprint” navigation solution.

Easy integration into equipment carts

Our NAV1 optical offers you a solution for the functional combination of all units in one place with the best possible mobility: easy positioning and integration into a KARL STORZ equipment cart – flexible and space-saving.

It is recommended to check the suitability of the product for the intended procedure prior to use.
