

In the U.S. and around the world, people are not getting access to the specialty MS care they need, when they need it. **Project ECHO** (Extension for Community Health Outcomes) **engages healthcare professionals in 40 countries through over 800 programs worldwide.**

Moving Knowledge, Not Patients

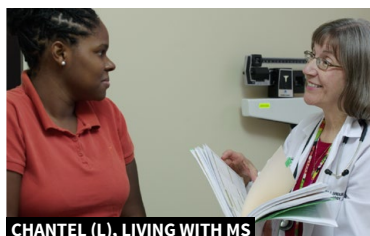

Through technology-enabled collaborative learning, **ECHO MS** creates access to high-quality specialty care in local communities.

Hub and spoke knowledge-sharing networks create a learning loop:

- Community providers learn from specialists
- Community providers learn from each other
- Specialists learn from community providers as best practices emerge

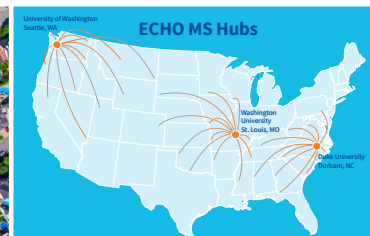

ECHO MS is Increasing Knowledge and Capacity for High-Quality MS Care

CHANTEL (L), LIVING WITH MS

CERMIT (L), LIVING WITH MS

Patients

- Patient cases are presented by providers
- Best practices are shared
- The patient receives the right care in the right place at the right time

Providers

- 12 CME credits
- 6-month cohort
- 60-minute lunch hour sessions
- Free of charge
- Collaborate with peers

Community

- Reduce disparities in MS Care
- Increase capacity for local MS care
- Build professional network

System

- 3 national ECHO MS hubs
- 75 provider participants
- Improving patient outcomes
