

Raptor®
grasping device

listening... and delivering solutions®

Offering the precision and strength needed during foreign body retrieval...

The Raptor® device:

- combines alligator and rat tooth capabilities into one device, increasing the gripping ability for a stronger hold
- eliminates reprocessing and ensures the device performs consistently each time it's used
- operates in a retroflexed position and in side-viewing endoscopes

NEW Raptor® grasping device - mini:

- features a smaller hybrid jaw and catheter option for tight or torqued positions
- specially designed for procedures requiring an ultra-slim endoscope
- offers the firm grip needed to retrieve foreign bodies and stents

For more information on the Raptor® grasping device, contact US Endoscopy today.
