

# VISITOR<sub>1</sub><sup>TM</sup>

THE FIRST INTRAOPERATIVE  
TELEMENTORING ROBOT

DELIVERING THE **FUTURE** OF TELEMEDICINE THROUGH REMOTE PRESENCE

# VISITOR<sub>1</sub><sup>™</sup> – MEETING THE CHALLENGES OF TELEMEDICINE

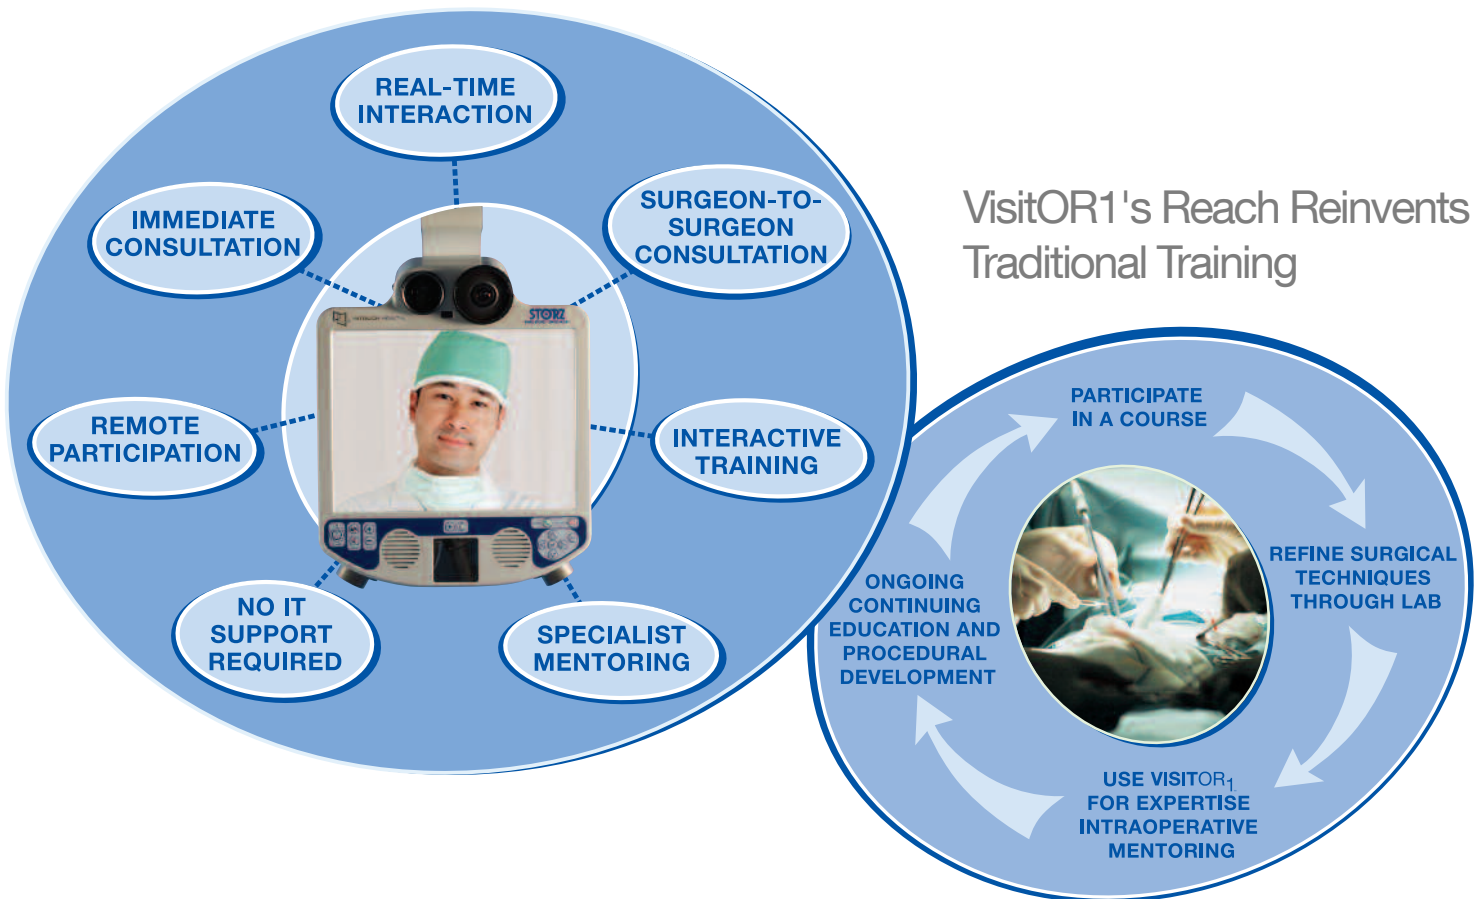

## Challenges:

- Inefficient Coordination of Resources
- Ineffective Bidirectional Participation
- Extensive Installation and Costly IT Support

## Through VisitOR1<sup>™</sup>, Telemedicine Evolves Into Remote Presence

Finally, the benefits of remote presence are available through the new KARL STORZ OR1<sup>®</sup> solution, VisitOR1<sup>™</sup>. This new technology will enable expert opinion leaders and consulting surgeons to beam into OR1<sup>®</sup> suites throughout the world via a simple click-to-connect experience. Telemedicine and remote presence will be changed forever.

## VisitOR1's Reach Expands Traditional Telemedicine

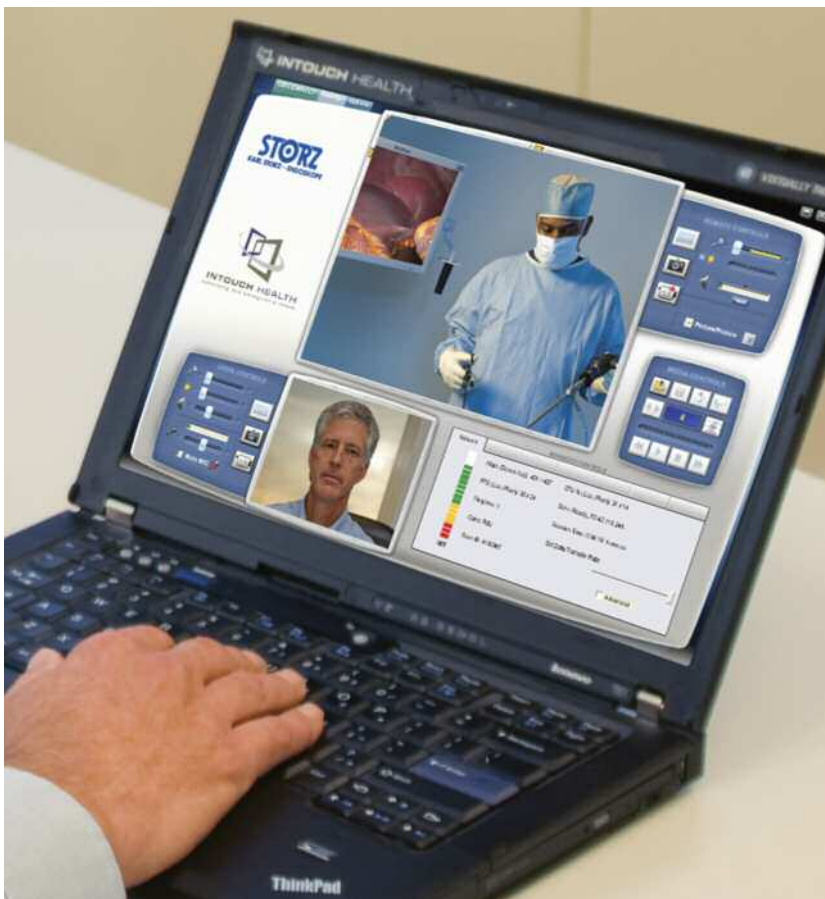

# INTERACTIVE

- Using the Surgeon Control Station from anywhere in the world, the remote surgeon can robotically control the VisitOR1™ within the surgical environment
- Pan and tilt capabilities give the remote surgeon complete situational awareness of all activities within the OR
- Using the integrated laser pointer, the remote surgeon can actively participate in any surgical procedure

# IMMEDIATE

- Using industry-standard tools, the Internet and VisitOR1™ technology, secure encrypted real-time audio and video communication offers simple click-to-connect technology
- Unlike traditional telemedicine solutions, VisitOR1™ uses SureConnect™ network connectivity, which requires minimal IT support
- Anytime, Anywhere Care

# INTEGRATED

- VisitOR1™ creates the ability for a clinician to be in two places at once, beaming into any OR1® worldwide for education and consultation
- VisitOR1™ integrates easily into your existing OR1® suite and is mounted directly on an OR spring arm to give maximum flexibility of positioning and views
- Auxiliary video inputs make any integrated video feed viewable by the remote surgeon, enabling complete intraoperative immersion
- Picture/video capture and sharing provides complete surgeon-to-surgeon synchronization
