

# Save time and increase profitability without sacrificing patient care

...with a state-of-the-art,  
procedure-ready ENT office

## Telepack X

The Telepack X is the ideal solution for the ENT office due to its portability, image quality, and integrated image capture. Take videos and stills, save them to a USB drive, and print to save in a patient's files.

## Unidrive ENT

The new UNIDRIVE® S III ECO shaver affords you the ability to use a shaver without the high cost of disposable blades. You will be able to save money with our ENT reusable straight blades. In addition, the UNIDRIVE® S III ECO shaver is quiet, simple and easy to use which is what you want in an office environment.

## 7220 Series Scopes

Increase patient comfort without sacrificing visualization. The unique optics in these scopes allow for brightness and field of view close to that of the 4mm scope, with the benefit of a low profile. These 3mm, 14cm scopes are ideal for in-office procedures and post op debridements.

## Don't forget the instruments

The new procedural set provides you everything you need for in-office balloon and basic sinus procedures. Enjoy the same quality in the office as you do in the O.R.
